Dear Mrs. Jane Henney,

My name is Douglas Woodard MacDonald. I am 11 years old. I am writing to you, to ask you to make sure that you make all food companies label packages that have bioengineered food as ingredients. I do not want to eat food that is bioengineered. I think myself and all other people have a right to know what we are eating. Please make food manufactures label all products that contain bioengineered ingredients.

Below, I gathered signatures from my school, friends and family who agree with me that all food must be labeled. None of us want to eat genes, pesticides, bacterias or basically anything altering natural food.

Sincerely,

*Douglas Woodard MacDonald*

Douglas Woodard MacDonald
